

The Vest Man

Cleaning Instructions and Other Important Information

- To clean your vest, start by using a clean damp cloth and simply wipe it down. The material is very durable and can take a good scrubbing. When your vest is ready for a washing you may machine wash your vest, BUT if your washing machine has a center agitator, please make sure all Velcro straps are securely connected. We don't want your straps getting tangled in your agitator. Next, if your vest is black or dark blue, invest in some Woolite Dark detergent. It will help keep your color dark and rich, if not just use a mild detergent. Wash in cold water and use high spin speed. NEVER EVER DRY CLEAN OR PUT IN A DRYER! YOU MAY ONLY HANG DRY YOUR VEST!! There is a urethane coating on the inside of your vest that keeps it water proof that will be destroyed by heat. The water proof material will dry fast
- Always keep your original concealable vest carrier around your body armor. The maker of your body armor probably has a warranty policy that requires your body armor to be encased in its original body armor carrier. Just to be clear, keep your body armor in the original vest carrier that it came in and put your body armor (in its original carrier) inside of your new Vest Man carrier. Failure to do this can result in your body armor warranty being in jeopardy.
- Your vest carrier is custom fit to you and your body. It should fit you snug and comfortable. Take some time to adjust your straps and see if it is as comfortable as you want it to be. If it is not as great as you had hoped, please email john@thevestman.com and we will work with you to make it fit as you wish. Please include your cell phone number in your email to expedite the process.
- We are a small business and our business thrives on referrals. If you aren't happy with your vest carrier PLEASE let us know! We want you to be happy with our product. If you are pleased with our product, please let your fellow officers/deputies know! We appreciate you sharing our information with nearby

departments and your work colleagues. Our website is www.thevestman.com and we have plenty of photos and information on our website. Thanks so much!
